VOLUME 37.

FRIDAY OCTOBER 13th 1939

NUMBER 29

Beets Rapidly Being Harvested

From daylight until long after dark every day the trucks and wagons hauling beets to the Factory are coming into the yards with their cargoes of roots, and every train day, with a few special freights in between bring from four to eighteen cars to keep the wheels of the mill turning and the granulated sugar pouring down the spout into the drier and out into the storage bins.

At the middle of this week it was estimated that 100,000 tons of beets had been dug out of an estimated crop of 275,000 tons, and from two to three weeks of good weather will be needed to complete the harvest. The two or three cold nights we have had have resulted in some slightly frosted beets, and these are sliced as soon as they arrive at the Factory.

Beets are testing 17.25 per cent sugar which is a very good test for so early in the season and this will increase as the season advances. Average yield is estimated at twelve and a half tons.

Wedding Bells

POWELSON — NELSON

Dean son of Mr. and Mrs. Dave Powelson and Lucella, daughter of Mr. and Mrs. Ward Nelson of Stirling, were quietly married at the Nelson home in Stirling Friday evening last with Bishop A. L. Favus officiating. Parents of both the young people, with other relatives were present for the ceremony.

Immediately following the ceremony a wedding supper was served at the bride's home, following which the young couple left on a honeymoon. They will make their home in Raymond where Dean is engaged in helping his father operate the farm south of town. We extend congratulations to the newlyweds and best wishes for a long and happy married life.

ISAACSON — PIEPGRASS

Ralph, son of Mr. Wm. Isaacson of Claresholm, and Joy, daughter of Mr. and Mrs. Fred Piepgrass were married Wednesday of this week at the home of Bishop and Mrs. James H. Walker with the Bishop performing the ceremony in the presence of the parents of the bride and members of the family.

The groom is working in the Factory at present, and the young couple will likely make their home in Claresholm where the groom helps his father, Will, in the operation of the farm. They are receiving congratulations and best wishes from their many friends and we join in extending our wishes for a long and happy married life.

WEAVER — JONES

The marriage of James S. "Jimmy" Weaver son of Mrs. R. Weaver and Bernyse, daughter of Mr. and Mrs. H. A. Jones both of Raymond was solemnized at the Alberta Temple on Wednesday of this week, in the presence of parents relatives and friends of both young people, with Pres. Edw. J. Wood performing the ceremony.

The young couple will make their home in Raymond where Jimmy works in the Quality Market, and with their many friends we extend best wishes to them for a long and happy married life.

FINISHING SURFACING FOR THIS SEASON

Completion of this year's surfacing program has just been announced by the provincial public works department.

Aided by favorable weather conditions, work crews have finished first and second course bituminous surfacing projects in various parts of the province.

According to a recent departmental report, bituminous surfacing involved 329 miles of Alberta highways this season. Bulk of this mileage was the laying of a second course, or "seal" coat. One of the main projects of this kind was the 78 mile stretch from Okotoks to Macleod, 28 miles from Macleod to Pincher and 32 miles from Pincher to Waterton lakes national park, or a total of 138 miles.

With steady progress being made in grading and graveling projects under good weather conditions, it is expected that these will be finished by Oct. 15.

Officials of the A.M.A. have been advised that the Big Bend section of the Trans-Canada highway has been completed by the Dominion government which is planning to turn this road over soon to the B.C. government. The official opening is to take place in June 1940.

NEWS NOTES

Milk River reports that a number of surveys for the surfaced highway is being run there now by government parties, and that from one of these four routes, the route for the hard surfaced highway through that district will be selected.

At the recent conference of the L.D.S. Church in Salt Lake City, Pres. Heber J. Grant and his counselor J. Reuben Clark expressed the belief that the controversies of the present war would be settled, finally around a conference table. At the same conference Elder Sylvester Q. Cannon apostle at large for the past two years, was made a member of that quorum to fill the vacancy caused by the death of Elder Melvin J. Ballard.

First Ward Supper Decided Success

Serving the first of their season's suppers Wednesday night, to raise funds for their building fund, the First Ward scored another bull's eye both in attendance and quality of the meal served.

Apparently arranged on short notice as the first we heard of it was Sunday evening, but this fact apparently did not interfere with the attendance, as from 6:30 p.m. when the first table sat down, until 8:30 when yours truly finished his report, the tables, which would seat just over 100 were filled continually, and lines waiting to be served.

According to the count of those in charge there were a total of 500 served during the evening.

As is usual at these events, in either ward, everyone had all they could possibly dispose of, and it was the best. Chicken and roast meat, three vegetables, two or three kinds of pickles, hot biscuits, pie and so on. If there were a lot of dreams after such a gorgeous meal, good or bad, that night, it would not be surprising.

Dancing followed the supper for those who desired to dance, or should we say for those who were able to dance.

NEWS NOTES

J. A. Ririe, merchant and sheep breeder of Magrath was in Raymond on Tuesday.

Lee and Gordon Brewerton were in Lethbridge on business Tuesday last.

Howard Oliver, Insurance man of Calgary was in Raymond a guest of the J. F. Salmon family over the week end.

On Monday of this week H. J. Fromm sold his new demonstrator Dodge Sedan to Mr. Haas, collector for the Allis Chalmers Co.

Mr. and Mrs. H. R. Brewerton returned from Salt Lake City Monday evening after a brief visit there and seeing their son Bud on his way to the South American mission. They report a very enjoyable trip.

Donald Burns, 13 was instantly killed and his brother William was seriously injured when the like on which they were riding was struck by a car as they pedaled along the highway two miles south of Olds on Tuesday.

The students of the Junior and Senior High, who attend at the High School celebrated "Stuff" day on Tuesday by taking Scotch leave. Notice of this move was given to the inner circle on Friday before school dismissed.

Lloyd MacPhee has had an entrance built on the east side of his new home. Henry Kendall did the work.

The air Wednesday morning was quite nippy after a bit of frost during the night. It warmed up nicely along toward the middle of the forenoon.

Miss LaVon King, secretary for the U.I.D. office at Glenwood was home for the Thanksgiving holiday, returning to her work Monday afternoon.

The Raymond A. A. A. are planning a big carnival for Nov. 10th. Watch for the advertising and hurry and get your tickets for the big prize.

The town has resembled the deserted village for the past ten days with people busy in the beet and potato fields, there are only a few of the old faithful left.

Tragedy struck west of Toronto Tuesday morning when two sisters Mrs. Gordon Brown and Miss Mildred Taylor, twin sisters, and 7 school children were killed when their automobile was struck by a westbound C.P.R. train, as Mrs. Brown was taking the children to school when the crash occurred and the bodies of the dead and pieces of the car were strewn along the track for a quarter of a mile after the crash.

New High School Addition Finished

STATION NEARING COMPLETION

Before many days now Fromm's Service Station will be in operation. The cement floor was laid in the office part of the building on Monday, and on Wednesday the cement was run for the island and for the top part of the hoist stand. The gasoline tanks are already in and full of gasoline, and the pumps will be installed and service started as soon as the cement on the island dries.

The floor in the greasing and washing part will be laid shortly and the wash rack is hooked on to the sewer so that the water will get away from the rack rapidly and leave the floor dry. Hyrum has kind of had the lay out made to order and has held up the progress of the work in places to change some little wrinkle that he thought would make for convenience in service. He expects to have gas, water and air all available at the same stop, and a car will be serviced and away in very short order.

LIBRARY NOTES

"World Affairs" a monthly magazine donated by the Parents and Teachers' Group.

"World Affairs" comes to the Library for both old and young, it is a monthly paper on current events and is written for the children in a way that all may read and understand. It is officially recognized by five Departments of Education for use in the school room.

NEW BOOKS

"The Blue Castle" by Montgomery.

"Black Bay and Chestnut" by Anderson.

"When a Man's a Man" by Wright.

The many readers of the books of Ethel M. Dell will be sorry to learn of her recent death. Her book "The Serpent in the Garden" was a summer book and came to our Library during the month of July.

The cheese factory being constructed at Glenwood in the U.I.D. is progressing favorably and farmers of that district will soon have a market at home for their dairy products.

Six woodsmen near Newcastle, N.B. were killed Thanksgiving day when the automobile in which they were riding to their work ran into a cement abutment and was wrecked by the impact.

Bob 'Seety' Armitt of Lethbridge won the Lethbridge Herald senior road race on Monday and made the Lethbridge Herald cup for the event his permanent trophy. Billy Green also of Lethbridge won the junior race.

The new two room addition at the high School is about completed and we are informed by Board Chairman D. C. Selman that it will be turned over to the Board Monday morning. It has been passed on by the architect and pronounced up to all specifications and is really a fine addition to the building, constructed in such a way that two more rooms can be added to the height of it whenever the School Board deem this necessary. These two additional rooms will greatly alleviate the over crowding of the past month which has been such a source of inconvenience to students and staff and will enable the grades to get permanently located now for the year's work.

In addition to the two new school rooms, the chemistry laboratory has been remodelled and made up to date in every way. According to students and teachers this is now one of the finest labs in Southern Alberta and will give the chemistry students a real opportunity to make their experiments with the most modern and approved equipment. The library room has also been redecorated and the shelving re arranged and renewed so that room too is all that could be desired. With the placing in the Library of an additional \$200.00 worth of new books, the students will have a good reference library to assist them in their studies.

All in all, there should be general rejoicing over the completion of the new school addition. The classes in Manual training and Home Economics have been seriously handicapped and some times not even attempted, and the other rooms have been packed with 60 to 80 in a room for some of the classes, so that it is not surprising that nerves should become razor edged some days before the dismissal bell sounded. The occupying of the two new rooms will change all this & the peaceful and untroubled atmosphere and discipline of school will quickly take the place of the crowded rooms of the past month. Congratulations to the School Board and the contractor and all those who have been responsible for getting the work done.

A heavy wind Monday made the Thanksgiving holiday rather disagreeable although the early morning and the evening were quite pleasant.

Elder Floyd Larsen has been transferred from the Swedish mission and will complete his labors in the North Central States Mission. He has about six months left to complete, his mission.

The Alberta government will allow a salary advance of one month's pay to married men and two weeks pay to single men, who enlist for active service, according to reports from Edmonton.

Canada To Be Air Training Centre

Because of its many natural advantages, its ability and organization to manufacture and assemble planes, and its nearness to the United States where most of the planes of the world are manufactured, decision has been made to have Canada the air training base of the Empire of Britain during the war.

In an announcement on Tuesday it was stated that delegates from Australia, New Zealand

and officials of the Air Ministry from London were meeting in Eastern Canada at once to arrange for the details of a plan whereby pilots and mechanics could receive their elementary training in their native country and be sent to Canada to finish off their schooling before going overseas to join the R.A.F. What this will mean to the Empire and to Canada remains to be seen, but it holds great possibilities.

1940 Ford V-8 Deluxe Fordor Sedan

THIS Ford V-8 deluxe Fordor sedan for 1940 is another big roomy car, with plenty of room for six. The new location of the finger-tip gearshift on the steering column clears the front compartment, making more room available so three can ride in perfect comfort on the front seat.

New seat cushions with "floating" edge, softer springs, improved shock absorbers and re-designed suspension combine to give an unusually comfortable ride. Other new features include a new controlled ventilation system, Sealed Beam headlights for safer night driving, softer springs both front

and rear and a new torsion bar ride-stabilizer. It has the famous 85-hp. Ford V-8 engine—which blends 8-cylinder smoothness with economy. Emphasis in interior styling is on fine appointments which harmonize with the trimly tailored upholstery.

CANADA, A GREAT COUNTRY

If we as Canadians, would think a little more of our country, surely when we sing "O Canada" our hearts would swell with justifiable pride over the words "O Canada, glorious and free." Very few countries have more to boast about in the way of freedom of thought and action, variety and extent of natural resources and opportunities for the young men and women that make up its population than has Canada, and Alberta has her full share or more.

Rising to meet a national emergency for one example, Britain hopes to make use of our peace and security, and the natural resources with which we are blessed, to make Canada the air training base of the Empire. Right now, some of the finest officers and men in the Royal Air Force are Canadian boys who have gone to England to enlist and have made good. There are thousands more training and ready to take the pilot's seat in bombing, fighting, and reconnaissance planes in the Allied forces, besides the hundreds who are taking care of the ever growing flying business of Canada's air lines. Other forces of business and industry are witnessing the same thing, we merely mention these because of the British Air Ministry going to locate a training school for air men from all the Dominions in Canada.

In natural resources Canada has nearly everything, 92 per cent of the world's known supply of nickel, in Canada, and 87 per cent of it in the mines at Sudbury. In a list of raw and manufactured products, which Alberta had to export, the Dominion government for war supplies were dozens of items, some of them which we confess we never knew existed in Alberta, although at that we knew we were wonderfully rich in mines, minerals, oils, and game.

It is, on Canada, fish, game and so on. Is it probable that when we walk and he knows things can-

the Creator placed Canada here, as a dominion of the mighty British Empire, he foresaw the day when Europe would be in the throes of revolution and war in every country, and that he used the broad expanse of our loved Dominion as a store house for the supplies that the peace loving and peace defending British Empire would need to prosecute to a successful finish a war that would raise the standard of liberty and justice to the nations of the world. Is it possible too, that our wealth should have been slow in its development, and not ruthlessly exploited, to be here in abundance when the very thing we are witnessing should take place.

We believe that he knows the end from the beginning. We believe that war will be poured out on all nations and only when men and nations will acknowledge in humility the goodness and mercy of God, may we look for peace. In the midst of this turmoil and upheaval, Canada, with her untouched wealth of natural resources, her millions of acres of wheat land, will become more than ever the granary and supply house of the world, and well might we be proud of the many valuable services these natural advantages will permit Canadians to render to our mother land, Canada, glorious and free.

DIG IN TODAY!!!!

It's all very well to talk about "The World of Tomorrow" as exemplified at the World's Fair at New York, but it's well to remember that it's the world of today we have to make a living in.

"To be brutally frank," the world of tomorrow with all its dreams, isn't going to help any about the taxes, the overdraft at the bank or the store bill that is long past due. When the bank manager calls your frequent attention to the sad state of your account, he isn't going to be interested in your pipe dream of the future — he is dealing in facts of today."

Yet it seems to us that half the people we meet live in the past, reminiscing, and the other half in the "pipe dreams" of the future.

Go to Sunday School and the lesson is invariably on something that happened 2,000 years ago.

Talk to the man on the side of the road. Is it probable that when

not go on as at present and he commences to prognosticate the future (pipe dreams.)

The churchman talks of the millenium; and the battle of Armageddon, etc.

Still the world goes on as it has done for tens of thousands of years and it will continue to go on in the same old way.

See time and harvest, but will be no harvest for the "pipe dreamer" who does not plan and dig in today."—Magrath Store News.

THE 1939 CANADA YEAR BOOK

The publication of the 1939 edition of the Canada Year Book, published by authorization of the Hon. W. D. Euler, Minister of Trade and Commerce, is announced by the Dominion Bureau of Statistics. The Canada Year Book is the official statistical annual of the country and contains a thoroughly up to date account of the natural resources of the Dominion and their development, the history of the country, its institutions its demography, the different branches of production, trade, transportation finance, education, etc.—in brief, a comprehensive study within the limits of a single volume of the social and economic condition of the Dominion. This new edition has been thoroughly revised throughout and includes in all its chapters the latest information available up to the date of going to press.

The 1939 Canada Year Book extends to over 1,200 pages, dealing with all phases of the national life and more especially with those susceptible of statistical measurement. A statistical summary of the progress of Canada is included in the introductory matter. This gives a picture in figures of the remarkable progress which the country has made since the first census of the Dominion was taken in 1871, sixty-eight years ago.

In the present edition, a complete list of special articles and of significant historical or descriptive text, it not being subject to wide change and is therefore not repeated is given following the Table of Contents. This list links the 1939 Year Book with its predecessors and indicates the extent to which the "Year Book" must now be regarded as a series of publications rather than as a single

PARENTS Give your Child this Advantage

SOMETHING every parent of a growing child should know—a survey of 10,000 school children has proved that a typewriter, used for homework, improves general school work enormously. Spelling, reading and composition are especially bettered. Why deny your child this help, when it costs so little?

Not only your children, but you, and all your family, will enjoy using the Remington Portable Typewriter at home.

REMINGTON PORTABLE TYPEWRITERS

may be purchased on deferred payments

as low as **\$3.00** a month

Recorder Office, Phone 24

volume.

There are over thirty maps and charts contained in the volume, and a photogelatine insert illustrating the special article on Noxious Forest Insects. Three lithographed maps are included.

In commemoration of the Royal Visit to Canada, May 17 to June 15, 1939, colour plates of Their Majesties King George VI and Queen Elizabeth, together with official pictures of incidents connected with the unveiling of the National Memorial and of the Royal Assent to legislation of the 1939 Session of Parliament, appear as frontispiece. At pp. 1155-1160 a short account of the Royal Tour across

Canada together with a condensed itinerary is given.

Persons requiring the year book may obtain it from the King's Printer, Ottawa, as long as the supply lasts, at the price of \$1.50, which covers merely the cost of paper, printing and binding. By a special concession, a limited number of paper bound copies have been set aside for ministers of religion, bona fide students and school teachers, who may obtain copies at the nominal price of 50 cents each.

Cloudy weather with a feel of snow in the air kept it cool all day Thursday but up to night no snow had fallen.

Hyrum J. and Moses Fromm delivered a Dodge Sedan Saturday evening to Dr. Schrieber of Magrath. The deal was made some time ago, but delay in receiving shipment locally, forced Hyrum to take the car off floor of the Marquis Motors in Lethbridge.

HOME STUDY COURSES

DO YOU want to be able to SPEAK IN PUBLIC or become a good conversationalist? Our course in PERSONALITY DEVELOPMENT AND SPEECH CULTURE shows you how to OVERCOME FEAR, DEVELOP SELF-CONFIDENCE, SPEAK EFFECTIVELY, and COMMAND ATTENTION. WANT TO WRITE? Our course in JOURNALISM and SHORT STORY WRITING are under the personal direction of a successful writer.

We also teach HIGH SCHOOL, MATRICULATION, and COMMERCIAL COURSES.

Take the C.C.C. Way to Culture, Efficiency and Success. Personal attention. Individual tuition. Modest fees. A postcard brings you details of our home study courses.

FALL SEEDING OF CRESTED WHEAT GRASS

Crested wheat grass like most other grasses must be seeded at a time of the year that will permit the seedlings to develop into strong vigorous plants before the hot dry summer months arrive. There are three times during the year when this seeding may be accomplished with a reasonable amount of success. They are very early spring, early fall and late fall.

Early spring seeding must be years. If spring weather conditions prevent seeding before this date, save the seed until the fall.

Early fall seeding, about the first half of September, has proven very successful in the Experimental Farm regrassing experiments. The field goes into the winter with a small amount of top growth and ready to continue growth in the early spring. Although early fall seedlings have not been damaged by winter killing in our experience, they are susceptible to grasshopper damage and special consideration should be given this menace at the time of seeding.

Late fall seeding from October 15th till freeze up allows for the early fall growth that is so essential and eliminates the fall grasshopper damage. The seed lies dormant during the winter but is present in the soil to receive considerable moisture from the spring thaw. This has proven to be an ideal time for seeding, the stands produced equalling those of the early fall seeding by the end of the first season. Do not seed after the top soil is frozen.

Protection from the hot sun is just as important to the seedling as moisture and this may be accomplished by seeding into a protective covering. Grain stubble or dead annual weeds are ideal for this purpose. These supply the necessary protection without draining the soil moisture supply.

If the plot is to be used for seed production seed at the rate of two to three pounds per acre, in rows three feet apart. After the stand is established, those rows should be cultivated to maintain maximum production. For hay and pasture, seed five or six pounds per acre in drill rows twelve inches apart.

Although the seed should not be placed deeper than one half inch in the soil, it is essential that it be drilled. This is accomplished by removing pressure from the disc springs, the discs being heavy enough to cut the necessary one half inch. The seed will run steadily through the grain hopper.

Do not be discouraged with the stand of grass established the first year. In some cases,

three years are required to produce a good stand. Experience of the Station has shown that seed had lain dormant without germinating for three years. Once seeded in the proper manner, leave the plot alone until the grass established.

TREE PLANTING

Wind-Breaks and Shelter-Belts

In an interview given today by the Hon. N.E. Tanner, Minister of Lands and Mines, it was learned that the Forestry Division of the Department are continuing to assist the farmers in the very important work of tree planting throughout the province by providing certain species of trees for transplanting as replacements and extensions of wind-breaks and also by planting in existing poplar and willow bluffs. The policy, carried on by the Department in the past, of furnishing trees of a more durable and longer lived species will be continued, Mr. Tanner stated.

A number of the native trees now found in existing bluffs are not sufficiently durable, creating a problem which may be solved by the planting of more suitable trees, both native and exotic to the province, a solution which already has been tried and found to be suitable. The present cover in natural bluffs will help young transplants greatly by providing the necessary shade until they have become firmly established in their new location.

The Minister stated that there is available for planting in the spring of 1940 a large quantity of white spruce, Colorado spruce, Norway spruce, lodgepole pine, green ash and red oak, together with a limited quantity of bur oak, western white oak, European larch, Siberian larch, Douglas fir and Scotch pine.

In order not to interfere with the commercial nurserymen throughout the province, it has been decided to confine the distribution of trees exclusively to farmers who will be receiving the transplants for replacement and addition to wind-breaks and shelter-belts and for planting in existing natural bluffs on their farms. No trees from the Forest Nursery will, therefore, be available to residents of cities, towns or villages, but they will be available, however, for rural schools and cemeteries.

Applications for the trees should be made to the Director of Forestry, Department of Lands and Mines, Edmonton, before January 31st, 1940. With the exception of transportation charge, the transplants, as in previous years, will be shipped free of cost.

Edmonton Letter

(By T. B. Windross)

Edmonton, Oct. 10.—Alberta industry's self-organization in order to do the utmost to help the Dominion in prosecution of the war is under way this week.

A list of Alberta natural products which can be used as war supplies has been handed to the Federal government, and business men are making arrangements to draft plans by which these products could be kept flowing.

Grain, oil, meats and meat products, hides and dairy products are among the chief products being considered, first, as well as a wide range of manufactured products. There are also benzene and toluene, used for explosives and derived from coal; methyl alcohol and formaldehyde, hydrogen, ammonia and nitric acid, derived from dry gas, premium motor fuels, aviation fuels, solvents, ethylene, glycerine and glycol, accessories to the production of war materials; salt which can be used in gun cotton, chlorine for water purification; gypsum, low grade phosphates, and bentonites for use in chemical industries; and even a special moss, known as sphagnum, which is useful for surgical dressings.

If industry is not being "conscripted," as Social Crediters demanded along with general conscription, it at least is enlisting voluntarily, observers commented. Although it is not generally known and has not been widely publicized, finance has also been conscripted by the dominion, as far as was possible without actual confiscation of wealth and consequent disappearance of the wealth.

The foreign exchange control board set up at Ottawa provides the conscription, for by its rule capital cannot be exported from the country except under license and then only for such purposes as will serve the nation's interest best in time of war. Exchange can be controlled only by the control of exports and imports. Imports must be paid for in foreign exchange, and exports are paid for in foreign exchange. No one may export without turning the foreign exchange over to the government, and no one may import without a government permit if payment in foreign exchange is involved. By such means in addition to sharp increases in personal and corporate income taxes and in excise profits taxes, the government has conscripted finance and industry.

Chartered banks have suffered as a result of these measures and they lose a profitable business in foreign exchange. Instead of retaining it as their regular commercial business, at a profit, they do it now gratis for the dominion's foreign exchange board, because the banks were conscripted by being appointed, along with the post offices, as the "authorized dealers" of that board.

Messages from Ottawa showed however, that the banks gave up that business voluntarily and willingly as a war-time sacrifice. Foreign exchange experts of all the chartered banks went to Ottawa and assisted officials of the Bank of Canada in drawing up the regulations which took the business away from themselves, and reportedly have formed a permanent committee to continue the cooperation. The extent of the bank's cooperation became known only when the dominion government and the foreign exchange board extended thanks to them.

In Alberta, J.R. Sweeney, deputy minister of agriculture, and O.S. Longman, field crops commissioner, said on their return from Ottawa that the expansion of agricultural production and a re-view of the whole farm production system in the dominion were discussed at an interprovincial conference with a view to supplying Great Britain as well as Canada with necessary agricultural supplies during the war.

Politics have almost disappeared from view in the province as a result of war, and some parties had declared a truce. J. I. McFarland, chairman of the United Council, said however, that his group would hold its

organization together to promote the cause of united action and thought among the people in war. Meantime the federal government's disallowance of the re-legislated Limitations of Act the previous similar act had been legislature in the spring after ions Act, passed by the Alberta disallowed, created hardly a ripple.

Members of the Alberta section of the Canadian Weekly Newspapers' Association held their annual Convention here Friday and Saturday. The convention was regarded as one of the most successful in the Association's history. New officials for the ensuing year were elected as follows: President—Harry F. Ford of the Lacanoba Globe; First Vice-President—Ray L. King of the Claresholm Local Press; Second Vice-Pres. L.D. Albertanson. During the Convention President H.T. Halliwell of the Dominion Association was presented with a handsome mantle ornament and Miss Hazel McCrea, Secretary, presented with a Trophy for editorial page excellency and also in commemoration of the work done for the Association by her father the late H.G. McCrea of the Hanna Herald.

NEWS NOTES

Get your Carnival tickets early and avoid continual canvassing. There will be lots of sales out and from what we hear your only salvation is either to buy or show a ticket.

An old age pensioner in Fulham, England, has decided to let his beard grow during the continuation of the war and to donate the money thus saved to the Red Cross. This is one way of helping in a good cause.

The benevolent old man was trying to instill the spirit of competition in an obviously unenterprising office boy. "My boy," he said, "do you know the secret of success in life?" No, I don't," the lad replied frankly. "But I'll bet there's a catch in it—like all the rest of them things. I'll lay you a hundred to eight it's something to do with hard work."

Tune in: **EARLY MORNING BROADCAST**
8:30 a.m. Monday thru Friday, world wide coverage by B. U. P.

NEWS NOTES

The Junior Girls of the 2nd Ward M.F.A. held an interesting and enjoyable party at the J. W. Evans home Tuesday evening when games and refreshments were enjoyed by the group.

Normal students home for the Thanksgiving holiday were Misses Marva Heninger, Olive Brandley and Genevieve Reid. Miss Brandley took them to the University of Regina to catch the evening bus back to their school.

Constable Norman Cleaver, 30 years, member of the R.C.M.P. stationed at Esterhazy, Sask., was murdered by Ernest Flook, 21, who attacked him with a hammer in an outbuilding and beat the officer to death and later when surrounded by police, shot himself with the service revolver he had taken away from the dead constable. Gleadow had arrested Flook for theft of a tire, anti-freeze and some gasoline that he had taken. This is the second R.C.M.P. constable to be murdered in the same district of Saskatchewan in two months, the other being shot by the Indian Nelson Sam. I'll lay you a hundred to eight it's something to do with hard work."

Admiral Reader has tendered his resignation as commander of the German fleet in protest of Von Ribbentrop allowing Russia to get the strategic sea-ports on the Baltic, which Reader says with Britain bottling up the Baltic on the west means in the German fleet with out an outlet in the event of any trouble between Germany and Russia. His resignation has not been accepted.

Hitler was to inspect a lunatic asylum. The inmates were carefully coached. As Hitler walked down the line each lunatic gave the Nazi salute and shouted, "Heil Hitler!" But the last man stood stolidly at attention. "Why don't you salute me?" shouted Hitler. "Your excellency is making a mistake," came the polite reply. "I am the keeper."

The New York Yankees won their fourth World pennant in Baseball when they took the Cincinnati Reds for four straight games winning Saturday by a 7-3 score and a 7-4 score on Sunday in extra innings, the Reds holding the lead until the ninth and then going to pieces in the extra frame.

Admiral Reader has tendered his resignation as commander of the German fleet in protest of Von Ribbentrop allowing Russia to get the strategic sea-ports on the Baltic, which Reader says with Britain bottling up the Baltic on the west means in the German fleet with out an outlet in the event of any trouble between Germany and Russia. His resignation has not been accepted.

"What time have you?" "I don't know," said the man at his watch. "Quarter to what?" "Dunno. You see, times got so tough I had to lay off one of the hands."

Hitler was to inspect a lunatic asylum. The inmates were carefully coached. As Hitler walked down the line each lunatic gave the Nazi salute and shouted, "Heil Hitler!" But the last man stood stolidly at attention. "Why don't you salute me?" shouted Hitler. "Your excellency is making a mistake," came the polite reply. "I am the keeper."

**A. M. A. AIDS WORK
OF SCHOOL PATROLS**

Reopening of schools in this province for the fall term has again drawn attention to the valuable work of school patrols. Encouraged by the Alberta Motor Association these patrols have been formed in various centres of the province and have given a good account of themselves. Undoubtedly the number of accidents has been reduced through the work of these patrols.

According to a recent statement at Edmonton by Traffic Sergeant Hiddell, the work here is to be extended this season in view of the growing interest in this protection for youngsters attending school, many of them for the first time.

In Calgary, and other parts of the province good reports were issued on the work of the school patrols, and it was added that this would be extended during the present term.

These patrols assist the children in crossing intersections near schools, causing traffic to

halt until groups of youngsters have crossed. The patrols, who are identified by distinctive arm bands and belts, are on duty when the pupils reach the schools and again when the schools close. Their efficient work has been commended by school board, police authorities, safety committees and others.

Melvin T. King of the Stake Presidency and his son Bruce, who is here visiting with his wife from his work in Sudbury, Ont., were speakers at the Second Ward sacrament meeting Sunday evening. Bruce reported some of his experiences while in Eastern Canada, and Pres. King related some experiences and some statistics he had obtained while attending summer school in Berkley, California. A good sized crowd was present and greatly enjoyed the meeting. Mesdames J.H. Walker and L. D. King contributed a vocal duet and Mrs. Louis Brandley gave a very interesting reading.

PAUL H. NAKAMURA

"You remembered when you cured my rheumatism a year ago, don't you, doctor," asked the patient, and told me not to get myself wet?"

"Yes, Ephraim," replied the doctor.

"Well, I just wanted to ask you if you think it safe for me to take a bath now."

With all of the Hitler stories going around you likely have heard this one. If you have, don't read on any further. But if you haven't here it is: Hitler had his fortune told recently and the fortune teller told him that he would die suddenly on a Jewish holiday. "Why on a Jewish holiday?" asked Hitler. "Because any day you died would be a Jewish holiday," remarked the fortune teller.

PROBLEMS OF EVERYDAY LIFE

By Mr. M.M. Lappin

Arthur T. asks me how to get rid of the blushing habit. "I have been afflicted with it ever since I can remember," he writes. "I seem to be getting worse. If I am in company with women, if I meet a young lady I know, or even if the name of one known to me is mentioned, I feel myself getting red all over. I am often teased about it and would do anything to get rid of it."

Blushing is sometimes the result of a guilt-complex. In that case the only cure lies in frankly facing up to the guilt, and determining not to err in the same way again. The fact, however, that you "have been afflicted with it ever since you can remember," and that you are now twenty six, would indicate that the cause of your trouble probably lies elsewhere.

If you were brought up in a strict atmosphere you may have acquired an unconscious sense of shame or fear regarding sex. In that case, the cure lies in frankly acknowledging the necessity of sex, and in deliberately adopting a right attitude to ward the opposite sex.

I think your trouble does lie here. Hundreds are suffering in the same way. If parents would take care not to impart, even unconsciously, wrong notions to their children, a lot of trouble in later life would be avoided. Recognize that sex is a gift of God. Like all other gifts rightly used it is a blessing. Abused, it may become a curse.

You may be too anxious to make "good" impressions upon the ladies and afraid you are not doing so. If that is the case, you must learn to forget yourself. Do not worry about the kind of impressions you make.
